#### E3 ISO Maker Manual 1.0

Update to E3 OS 1.35, E3 ODE PRO can use the E3 ISO Maker function, which can be used to generate ISO files from the original or burn disc with PS3. Here is the way :

1: Prepare A FAT32 USB DISK

2: Put the keys file, E3 manager and one workable ISO into the FAT32USB DISK root directory. Connect the USB DISK into USB port of E3ODE PRO.

3: Put the DISC which want to be dumped into PS3 and then run PS3

4: Enter E3 OS 1.35, choose the Select to make e3iso, E3 OS will jump out and restart, at the same time it will start to make ISO.

	BLES-01233.e3iso.Select multiMAN 4.46.01 BASE (for BD-R and ODE).iso.Select
6	Select to make e3iso
	Select to PS3 BD drive
	Select to run manager
	wu xian hui lang2.iso.Select

5: Enter the E3 OS 1.35 again, user will find Select to cancel and return

to OS option. If user choose this option, the ISO generation will stop. If don't choose, it will continue to generate ISO file until generation is completed.

6: After ISO making complete, E3 OS will jump out . User can enter the E3 OS 1.35 again to play game .

Please note : User can judge the ISO generating completed or not with this way. (Enter E3 OS, showing Select to cancel and return to OS means ISO is generating, not complete. IF enter the normal OS mode which can play game, it means generating completed)

7: Remove USB DISK from E3 ODE PRO and insert into PC, run the E3ISOMaker merger tool 1.0
